PERSONAL PROJECTS

[You Tube Clone](#)

This is a fully responsive YouTube clone application using React.js and Tailwind CSS to deliver a modern and dynamic user experience. Implemented Context API for state management, React Router DOM for seamless navigation, and integrated React Icons for a polished UI. Enhanced user interaction with React Toastify for effective notifications and leveraged RapidAPI to fetch and display YouTube data.

[Portfolio](#)

A fully responsive portfolio built with React.js and Tailwind CSS. Showcases my latest projects and includes a section highlighting my skills. Optimized for all devices with a clean, modern design.

[Expense-Tracker](#)

This is a responsive Expense Tracker application using React.js and Tailwind CSS. Leveraged Context API for state management and React Router DOM for navigation. Designed for real-time expense tracking and effective budget management, with a focus on clean UI and ease of use.

[Currency Converter](#)

This project is a Currency Converter application built using React.js and Tailwind CSS. It allows users to convert between different currencies with exchange rate updates. Tailwind CSS is used for styling and layout. With its dynamic functionality this application provides a reliable tool for managing currency conversions.
